DOCKETED

APR 16 2014

Dear Chairman Stump,

As you are aware, energy efficiency plays a role in our state's energy mix. If this were to increase, there would be numerous benefits to individuals, businesses and our communities. Increasing energy efficiency is one of the most effective ways to reduce energy waste and energy bills. Any costs that my business can reduce from its energy bill can in turn reduce the costs that our customers are responsible for. These savings would increase the money that could be spent to improve our services even further.

The initial costs of replacing current technologies can be offset by rebate plans offered by the APS Solutions for Business department. These initial costs pay for themselves throughout the lifetime of the improved technology. I have made efforts to increase the energy efficiency of my business and I would like to see others do the same. The benefits outweigh the costs tremendously.

Thank you for your leadership and efforts to support energy efficiency in the APS implementation plan, although I am disappointed that you voted to waive part of the energy efficiency rule.

Thank you,

Child Care   
Food Program
